MA/LFP

潜水搅拌机

MA/LFP submersible mixer

MA/LFP 潜水搅拌机

MA/LFP submersible mixer

低速推流器
Low-speed flow propeller

混合搅拌机 (带导流罩)
Mixing agitator (With dome)

混合搅拌机
Mixing agitator

特点 Features

- 两道独立的机械密封，保证潜水电机长期可靠运行。
- 高质量国际知名品牌免维护轴承，使用寿命长。
- 独特的电缆密封设计，排除了电缆漏水的隐患。
- 电机轴采用不锈钢材质，转子经动平衡检测，运转平稳。
- 内部设有泄漏传感器和定子绕组超温保护装置（MA0.37/6、MA0.55/4无泄漏传感器）。
- 混合搅拌器的不锈钢冲压叶浆，经优化设计叶片呈后掠式，效率高，具有自清洁功能。
- 低速推流器叶浆由玻璃钢制成，呈后掠式，具有自清洁功能；叶浆光滑的流线型表面，使推力被平均分配。
- 低速推流器所有接触介质的紧固件均采用不锈钢材质；减速装置采用安全系数较高的斜齿轮减速机。

用途 Purpose

GSD潜水搅拌机分为混合搅拌机与低速推流器，主要适用于：市政和工业污水处理过程中的混合、搅拌和环流：活性污泥池、生物反应池、搅拌池、贮泥井、均衡池、污水池等；景观水环境的养护设备，改善水体质量；创建水流，有效阻止悬浮物沉积。

The submersible mixers in our company include mixing agitator and low-speed flow propeller, mainly used for: The purposes of mixing, agitating and making ring flows in the process of municipal and industrial sewage treatment: activated sludge tank, bioreactor tank, mixing tank, sludge silos, equalizing reservoir, sewage tank and etc.; The maintenance equipment for the landscape water environment, improving the quality of the water body; Creating water flow, effectively preventing the sedimentation of the suspended substances.

- The two rows of independent mechanical sealing ensure the long-term and reliable operation of the submersible motor.
- The international well-known high-quality bearings have longer service life, which are maintenance free.
- The unique sealing design for the cables removes the hidden danger of water leakage for the cables.
- The shaft of the motor employs the stainless steel, and the rotors are inspected with the use of dynamic balancing, leading to smooth rotation.
- The in-built leakage sensor and the device for the overtemperature protection for the windings of the stator(No leakage sensor for MA0.37/6 or MA0.55/4).
- The mixer agitators have the stainless steel pressing impeller, which are of the sweptback shape through the optimized design, resulted in high efficiency and self-cleaning function.
- The vanes of the low-speed flow propeller are made of FRP, which are sweptback shape, have the self-cleaning function, the smooth and streamlined propeller surface distributes the propelling power equally.
- On the low-speed flow propeller, all the tightening pieces which will contact media employ the stainless-steel material; The decelerator employs helical gear speed reducer with high safety coefficient.

适用条件

- 介质温度：≤40℃
- 介质pH值：5~9
- 介质密度：≤1150kg/m³
- 潜水深度：≤20m
- 电源：380V，50Hz
- 电机：F级绝缘并符合IP68，24小时连续运行
- 潜水搅拌机必须完全潜入水中工作

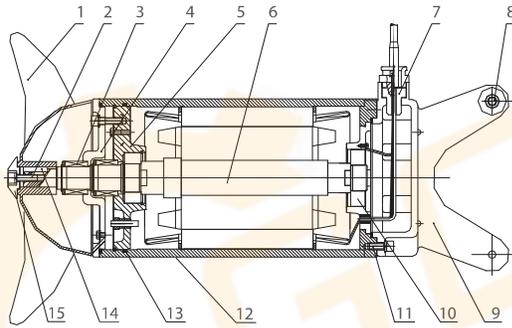

Conditions of usage

- The highest temperature of the media shall not exceed 40℃
- The pH value of the media: 5~9
- The density of the media shall not exceed 1150kg/m³
- The depth of submersion shall not exceed 20m
- The electric power supply: 380V, 50Hz
- The motor: F class insulation and in accordance with IP68, continuous operating in 24hr
- The submersible mixer must operate in the complete submersion into water

注：

- 潜水搅拌机的专用安装系统，可在无需排出池中污水的情况下，快速安装和拆卸潜水搅拌机。
- 安装系统 I 只适用 H ≤ 3m，机型为 MA0.37/6、MA0.55/4、MA0.85/8 和 MA1.5/6，可在水平方向和垂直方向调节角度。
- 安装系统 II、III 导杆可沿水平方向绕导杆轴线旋转，最大转角为 ±60°，当 H > 4m 时需在导杆中间添加一支撑架。
- 支撑架和下托架与池壁、池底均可用膨胀螺栓或化学锚栓固定，对于大直径叶轮和大功率搅拌机最好采用预埋。
- 客户订货时，请提供池深 H 及池型图，以便确定导杆尺寸和支撑架个数。
- 同一种安装系统，多台搅拌机可共用一套起吊系统。
- 安装系统可选择采用不锈钢或碳钢防腐材质。
- LFP 叶桨直径为 1100mm 时，安装系统无斜撑。

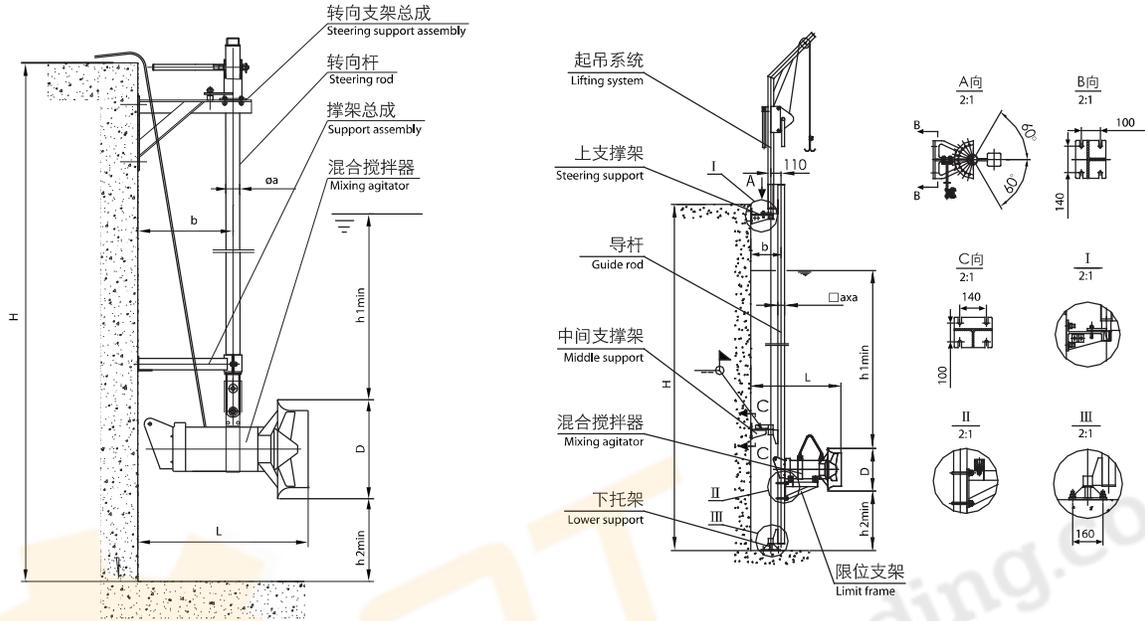

Installation modes and dimensions

The submersible mixers can be installed in a multiple of modes. Here are generally accepted modes of installation for selection with reference made to the following table. Our company can also provide the special designs in accordance with the demand of the users.

Notes:

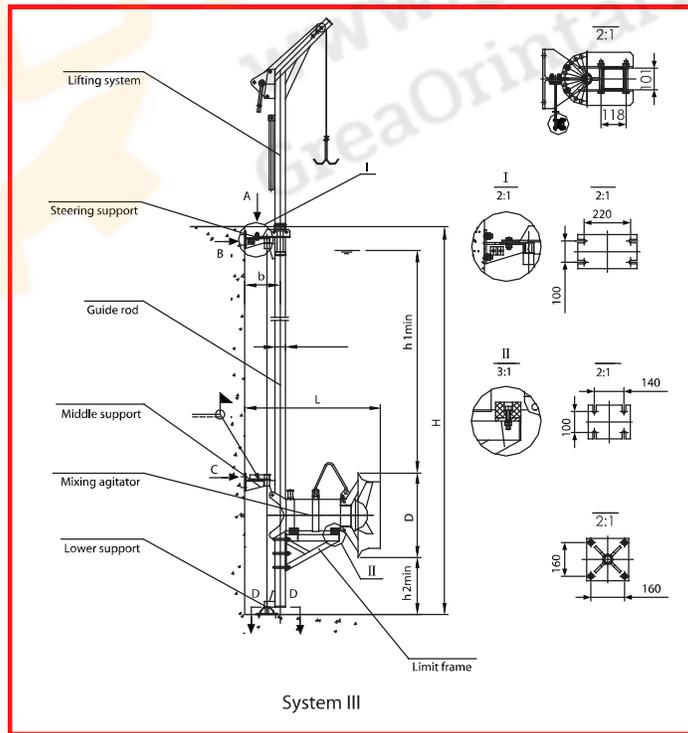

- The special installation systems for the submersible mixers can facilitate the quick installation and dismantling of the submersible mixers under the conditions of no need for draining off sewage from the pond.
- Installation System I is only suitable for H ≤ 3m and the mixer models of MA0.37/6, MA0.55/4, MA0.85/8 and MA1.5/6, and with the possibility of adjusting the angles in both horizontal direction and longitudinal direction.
- For installation systems II and III, the guide rod can rotate round the axial line of the guide rod along the horizontal direction with the maximum angle of rotation ±60°, if H > 4m, it is necessary to add a supporting frame between the guide rods.
- The supporting frame and the lower support shall be fixed onto the pond wall and the pond bottom with the use of expansion bolts or chemical anchors. For the big diameter impellers and the big power mixers the best choice is to pre-embed.
- While placing an order by customer. Please supply the pond depth H and the drawing of the pond shape so as to determine the dimensions of the guide rod and the number of the supporting frames.
- A multiple of mixers with the same installation system can share one lifting system.
- The installation systems may employ the material of stainless steel or carbon steel for the selection of the corrosion-resisting properties.
- The LFP installation system has not the slant support, when the impeller diameter is 1100mm.

配置示意图

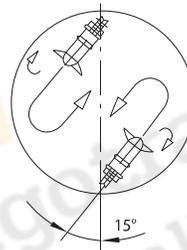

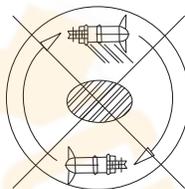

潜水搅拌机的安装定位对其搅拌效果有很大的影响，为了达到良好的运行效果，我们建议用户按照专业设计人员的要求去做，要充分考虑到水池的形状，进出水的位置以及搅拌机的水流反射到构筑物而引起的涡流等情况，尽量减少短路循环和死角产生，避免与池壁的撞击而降低流速。参照下面的配置示意图，可帮助您合理选择搅拌机和安装型式。

Arranging sketch map

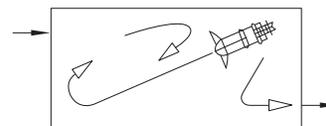

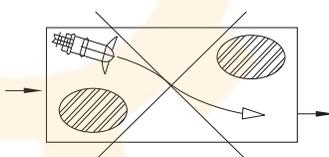

The installation and positioning of the submersible mixers will produce a great impact on the effect of mixing. In order to obtain the perfect operating result, it is suggested that the advice of the specialized designers shall be followed and full consideration given to the shape of the pond, position of the water inlet and outlet, the vortex resulting from the outflow from the mixer onto the structures and some other conditions. Every effort shall be made to reduce the short-circuit circulation and the occurrence of dead corners and avoid the dashing of the flow against the pond wall to lower the flow velocity. Making reference to the arranging sketch map below will help you to make a reasonable selection of the mixers and their installation modes.

混合搅拌器 Mixing agitator

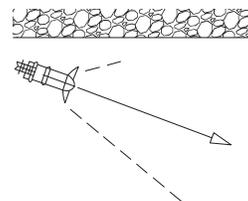

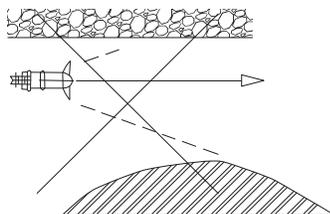

避免短路循环
Avoid short circuit flows

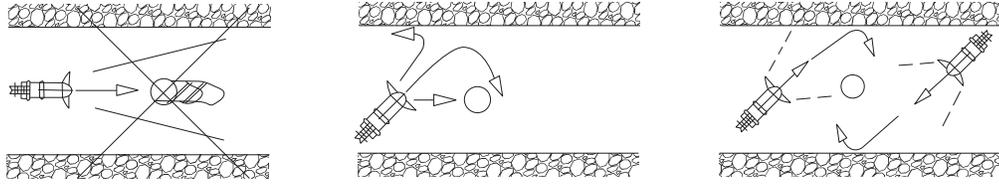

考虑进出口
Take inlet and outlet into account

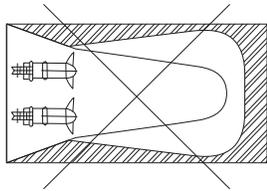

考虑喷射流范围，避免与池壁发生不必要的冲撞
Take jet expansion into account, no unnecessary wall friction.

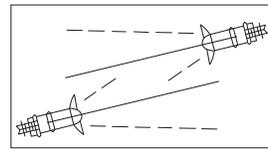

安装引起的死区
Installations cause dead zones

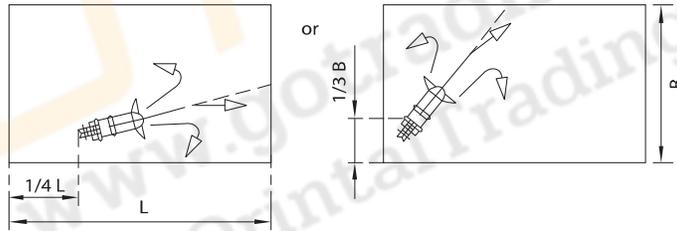

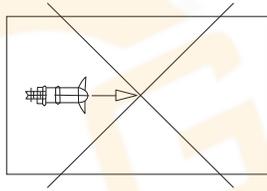

喷射流的交叉
Jet intersections

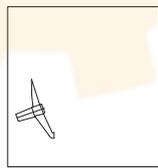

考虑到恒一能量的供应
Take uniform energy supply into account

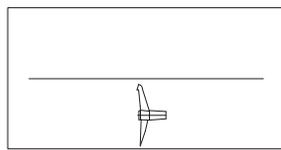

利用池壁反射
Use wall reflections

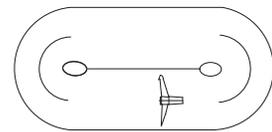

低速推流器 Low-speed flow propeller

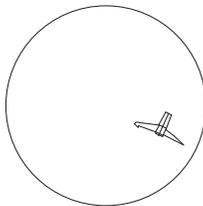

方形池 Square pond

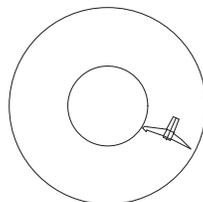

矩形池 Rectangular pond

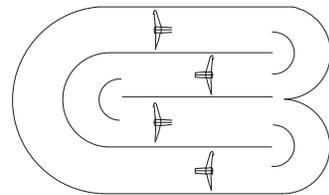

跑道形池 Track-shaped pond

圆形池 Circular pond

环形池 Ring-shaped pond

S曲线形池 S-shaped pond
